MICRO TRACKER

What is the Geonix Personal Tracker?

The Geonix Personal Tracker is a multi-feature, tri-band GSM, tracking and personal protection system. In addition to GPS tracking, it offers two-way voice communications – all in a small, lightweight enclosure with a specialised 360° degree GPS antenna allowing it to capture and transmit its position irrespective of the unit's position or alignment.

The Geonix Personal Tracker has its own internal (rechargeable) battery and can send reports via both GPRS and SMS on GSM networks worldwide.

What does it allow you to do?

- keep continuous real-time track of your loved ones or employees
- Automatically trigger alerts when your loved ones or employees leave or enter an designated area e.g. school, warehouse complex
- make 2 way voice calls to a total of three dial out numbers and receive calls from any land or mobile phone
- send 2 types of user-defined alerts e.g. SOS, "I have just left"
- remotely open a direct voice channel to the unit without requiring a response from the unit, allowing covert listening-in or emergency support
- provide additional safety, security and support for your employees and loved ones

Why buy a Geonix Personal Tracker?

- real-time tracking capability: its 360° GPS antenna allows it to capture and transmit its position irrespective of the unit's position or alignment. Tri-band GSM operation allows it to be used on GSM networks worldwide
- 2 way voice call capability: makes it suitable for providing support services to employees and expeditions or monitoring and protecting friends and families
- in-built memory: ensures constant tracking capability by storing GPS data when a GSM signal is not available and then sending the data when one becomes available. Also supports passive tracking applications
- practicality: the device is lightweight and can be concealed on a person, in a vehicle, in a briefcase etc
- alerting functionality: automatic alerts via 4 configurable geo-fence zones including 1 self geo-fencing zone and 2 manual alerts for user defined applications e.g. SOS, status alerts

GT4009 Covert Personal Tracker

Package includes:

- GT4009 personal tracker
- 2 way voice functionality
- 12 month warranty
- configuration software
- USB programming lead
- manual

Key Features:

- real-time GPS tracking worldwide
- GPRS and/or SMS transmission
- in-built memory for storing tracking data when GSM is not available and to facilitate passive tracking applications
- 360° GPS antenna
- small: 94mm(L) x 60mm(W) x 28.5mm (H), lightweight: 100g
- up to 4 configurable geo-fence zones including 1 self geo-fence
- ability to make and receive voice calls
- 2 level alerting mechanism
- auto-answer listen-in feature
- advanced reporting control including a SMS limiter

Requirements for end-to-end solution:

- SIM card from local GSM Service Provider
- Geonix Tracking Software
