

Full User Guide

(We suggest this full process for the first use of ThurayaLocate, particularly if you have not used the GPS features of your handset before. After first use, follow the quick guide below)

- Switch on the SO-2510 Handset (via the red labelled End key) and store the number +278388918342 in your phonebook (under ThurayaLocate or similar)
- With the handset upright, in an out-of-doors location and with a clear view of the sky overhead, select the menu option (by pressing the left hand soft key)
- Scroll to the Navigation Option and press Select, then scroll to 'Current Position' and press Select
- The handset will then look for GPS satellites – this may take an extended time (up to 30 minutes) when used for the first time or if the handset has not recently been used in SAT mode. Once a position is found the screen will display your current location
- Select 'Option' via the left hand soft key, scroll down three places to 'Send', select the SMS option, scroll to 'Send' and select. Add a point name – the name input here will show on the SMS sent
- Select the ThurayaLocate number you stored in step 1 ('Search' followed by centre button to 'Select' then left hand button to 'Add') and press Send
- The GPS co-ordinates will now be sent. You will see confirmation of the process on the screen

Quick Guide

- Take handset outside, hold or stand upright, acquire GPS Current position by pressing 2,1
- Go to 'Send as SMS' and select ThurayaLocate number from phone book, press Send
